

JUAN DAVID QUINTERO PEÑA

Cali, Colombia | +57 322 519 7962 | juandavidquintero0805@gmail.com | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Bilingual (C1) Software Engineer specializing in scalable multi-tenant architectures, intelligent automation, and backend infrastructure. Proven track record of leveraging modern frameworks (Next.js, NestJS) and applied AI to deliver high-impact solutions, combined with cross-functional leadership and high-stakes operational discipline. Driven to bring a product-oriented mindset and technical rigor to a high-growth engineering team focused on building robust, user-centric software.

PROFESSIONAL EXPERIENCE

Carolina Pena Inmobiliaria — *Software Engineer & Digital Consultant* Cali, Colombia | Mar 2026 – Present

- Engineered a full-stack property management CRM (Next.js, Supabase) with Meta Ads and WhatsApp API integrations to streamline lead qualification.
- Automated AI-driven copy generation and cross-platform publishing for 200+ properties, saving ~16 hours of manual labor per week.
- Processed 140+ qualified leads across a 3-month period by optimizing minimal ad spend through automated digital funnels.

Camp Romaca — *Bilingual Operations & Safety Coordinator* Becket, MA, USA | Jun 2026 – Aug 2026

- Operated in a 100% C1 English environment, executing zero-tolerance safety protocols and translating complex operational safety procedures into actionable steps under pressure.
- Coordinated camp-wide logistics and managed diverse groups in high-stakes environments, demonstrating rapid problem-solving and cross-functional leadership.

Universidad Icesi — *University Operations Monitor* Cali, Colombia | Mar 2025 – May 2026

- Represented the university during high-visibility public relations events, delivering persuasive, data-backed presentations to prospective students.
- Managed dynamic event logistics and facilitated seamless administrative communication, effectively bridging the gap between internal stakeholders and external audiences.

Freelance — *Software Developer* Cali, Colombia | Aug 2023 – Feb 2025

- Developed custom algorithmic solutions, data structures, and backend features in Java for independent clients on an ad-hoc basis, ensuring 100% project delivery and specification compliance.
- Analyzed complex technical requirements to debug, refactor, and optimize existing codebases, consistently improving logic efficiency and overall application stability.

SELECTED TECHNICAL PROJECTS

B2B Consulting Governance & Analytics Platform (*NestJS, Next.js, PostgreSQL*) Feb 2026 – Present

- Architected a modular enterprise platform (NestJS, Next.js, PostgreSQL/Prisma) and established an institutional Master Data Management (MDM) Golden Record, eliminating data fragmentation from legacy spreadsheets.
- Audited and recovered governance over 298 stalled commercial proposals valued at +\$14.9B COP (~\$3.7M USD) by standardizing BPMN quoting pipelines and deploying unsupervised clustering (Python, scikit-learn) for corporate client segmentation.

B2B Multi-Tenant SaaS Automation Platform (*Next.js 15, Supabase*) Feb 2026 – Present

- Architected a modular multi-tenant monolith (Next.js 15, Supabase) with strict tenant isolation via middleware and RLS policies.
- Implemented Adapter and Strategy patterns to resolve codebase fragmentation, enabling seamless custom ERP integrations.

Distributed Electoral Voting System (*Java 11, ZeroC ICE*) Aug 2025 – Dec 2025

- Implemented the Reliable Messaging pattern (store-and-forward, automated retries, UUID) ensuring zero lost/duplicated votes.
- Validated fault tolerance with load tests of 100k+ votes and seamless automatic recovery after simulated 30s network failures.

Enterprise HR Agile Platform (*Spring Boot, Next.js, Jenkins CI/CD*) Feb 2026 – Jun 2026

- Served as Scrum Master for an 8-person engineering team, facilitating sprint deliveries and unblocking technical impediments.
- Built full-stack features including secure authentication, real-time Kanban dashboards, and automated Jenkins CI/CD pipelines.

Intelligent Electives RAG Chatbot (*APIs, n8n, pgvector*) Aug 2025 – Dec 2025

- Built an AI conversational assistant across 120+ courses combining semantic vector embeddings with SQL full-text search.
- Orchestrated data flows and LLM generation via n8n to accurately map exact scheduling constraints with fuzzy semantic intent.

EDUCATION

Universidad Icesi — *Bachelor of Science in Systems Engineering* Cali, Colombia | Expected Jul 2027

GPA: 4.4 / 5.0 | **Honors:** Academic Excellence Scholarship, Consistent Honor Roll.

TECHNICAL SKILLS

Languages:	TypeScript, JavaScript, Java, Python, Dart, SQL
Frontend & Mobile:	Next.js 15 (App Router), React, Flutter, Tailwind CSS
Backend & APIs:	NestJS, Spring Boot, Express, Django, Node.js, REST APIs, GraphQL
Database & AI:	PostgreSQL, Supabase, Redis, pgvector, n8n, Meta Graph API, RAG/CAG Architectures
Cloud, DevOps & Arch.:	Google Cloud, Docker, Kubernetes, Jenkins, CI/CD, GitFlow, ZeroC ICE
Soft Skills & Languages:	Agile (Scrum/Kanban), Cross-functional Leadership, Crisis De-escalation; English (C1), Spanish (Native)
